

**THE COLLECTION OF APPLICATIONS TO EXHIBIT AT LAMIERA 2022 IS IN PROGRESS.
THE EVENT WILL BE ON THE SCENE AT FIERAMILANO RHO FROM 25 TO 28 MAY.
THE KEY PLAYERS OF THE SECTOR HAVE ALREADY CONFIRMED THEIR PARTICIPATION.**

The organisation of LAMIERA 2022 is in full swing. The international exhibition dedicated to the industry of sheet-metal forming machines tools and innovative technologies related to the sector will take place at fieramilano Rho from 25 to 28 May.

The 21st edition of the trade fair, promoted by UCIMU-SISTEMI PER PRODURRE, the Italian machine tools, robots and automation systems manufacturers' association, and organised by CEU-CENTRO ESPOSIZIONI UCIMU, aspires to repeat the success of the two previous editions held in the same venue, which saw the biennial event constantly grow, in terms of technologies on show, exhibition area, exhibiting companies and visitors.

The next appointment with LAMIERA, initially set for 2021 and then rescheduled for May 2022, will present an extremely positive context, also considering the dynamism of the Italian and foreign markets.

“The return to an exhibition experience over the last few months – stated **Alfredo Mariotti**, general manager of UCIMU-SISTEMI PER PRODURRE – confirmed the importance and the high value of trade shows. To see machinery first-hand and meet partners and customers in person are wishes shared by all the operators of the sector; thus, we are sure that the next edition of LAMIERA will achieve excellent results. The postponement to 2022 has been a forced decision due to the public health situation we were experiencing, but it has also been a carefully considered choice, made with a strong sense of responsibility.”

“In May 2022 we will have the occasion and the opportunity to offer a richer and safer exhibition that will host more exhibitors and visitors. We are certain that thanks to the constant vaccination campaign and the use of established safety rules, late spring will be the ideal time for our event”. “We the organisers are working intensively – concluded **Alfredo Mariotti** – to offer a trade fair rich in novelties, technological innovations and side initiatives and we believe that it will be a success. This prediction is confirmed by the high number of applications we have already received and keep on receiving”.

Less than six months before the event, all the key players of the sector have already confirmed their participation. There are plenty of reasons and advantages that encourage the companies to take part in LAMIERA 2022. Among these, surely also the extension of the measures 4.0 implemented by the Italian Government, which will remain in force at least until the whole year 2022. A great business opportunity for all exhibitors that will meet end-users at the next edition of LAMIERA.

Machines, plants, equipment for processing and cutting sheet metal, tubes, sections, wires, metal structural work, presses, dies and moulds, welding, surface treatments and finishing, robots, automation, parts, components, accessories, tooling, fastener materials, technical and industrial subcontracting, control and quality systems, metrology, software, micromachining, additive technologies and solutions for the digital factory, energy and production streamlining: all these products and solutions will represent the core of the exhibition.

Numerous Innovation Areas will be proposed at the trade show: **Fabbricafutura**, dedicated to software and technologies for connectivity and data management; **Box Consulting**, a space for consultants and trainers; **Fastener Industry**, centred on screws, bolts, fastening and clamping systems; **EcoCoatech**, dedicated to sheet-metal painting and coating processes; **Blech Italy**, reserved for subcontracting and services for the industry, and **Saldatech**, focused on the welding sector.

Moreover, besides the wide product ranges on show, representing **the best international production with regard to stand-alone machines and complex plants**, as well as a comprehensive overview of **automation systems, robotics, technologies related to the digital world and to energy and production streamlining**, LAMIERA 2022 will propose a large number of in-depth-analysis and entertainment initiatives, in order to make the most of the presence of operators taking part in the event. For example, the initiative **LAMIALAMIERA** will propose again its arena for conferences dedicated to specific issues and side events that will host discussions among opinion leaders and experts, as well as presentations of innovative technologies arranged by the exhibitors.

Therefore, LAMIERA 2022 will be able to offer a complete, innovative visit experience, with an eye to the future of the sector.

Further information on the exhibition and details on the application procedures to participate are available on lamiera.net.
