Interpoma 2022

Bolzano becomes the apple capital!

Interpoma is the only trade show in the world dedicated exclusively to the world of apples, from production to storage and marketing. And much much more: Interpoma is an international platform that brings together apple experts from all over the world with their ideas, products, technologies, and projects and offers innovative solutions.

Why at Bolzano/ South Tyrol (I), far away from the big trade show metropolises? What may seem unusual is actually one of Interpoma's trump cards: the strong roots in the region. After all, with its 18.400 hectares of cultivation area, South Tyrol is the largest apple-growing region in Europe and one of the most important in the world. Interpoma was born from this know-how, initiated and supported to this day by strong partners in the sector.

A top international congress, tours to innovative companies, the Interpoma Award with pioneering projects from all over the world... but above all, personal contact to no less than 500 international exhibitors with their latest products and 20.000 visitors from over 70 countries with their unique experiences. That's Interpoma.
