

EFI Reggiani, a world of solutions for textile market

EFI Reggiani Innovation Trendsetter

One-stop-shop
for industrial textile needs

Blazing a path to the next level of the industry

- ✓ Performance and Productivity
- ✓ Reliability and Low maintenance
- ✓ Cost effectiveness
- ✓ Full Green Processes
- ✓ New applications

Textile in our DNA since 1946

The long-lasting expertise in Textile makes EFI Reggiani the **Trusted Advisor** for integrated scalable solutions

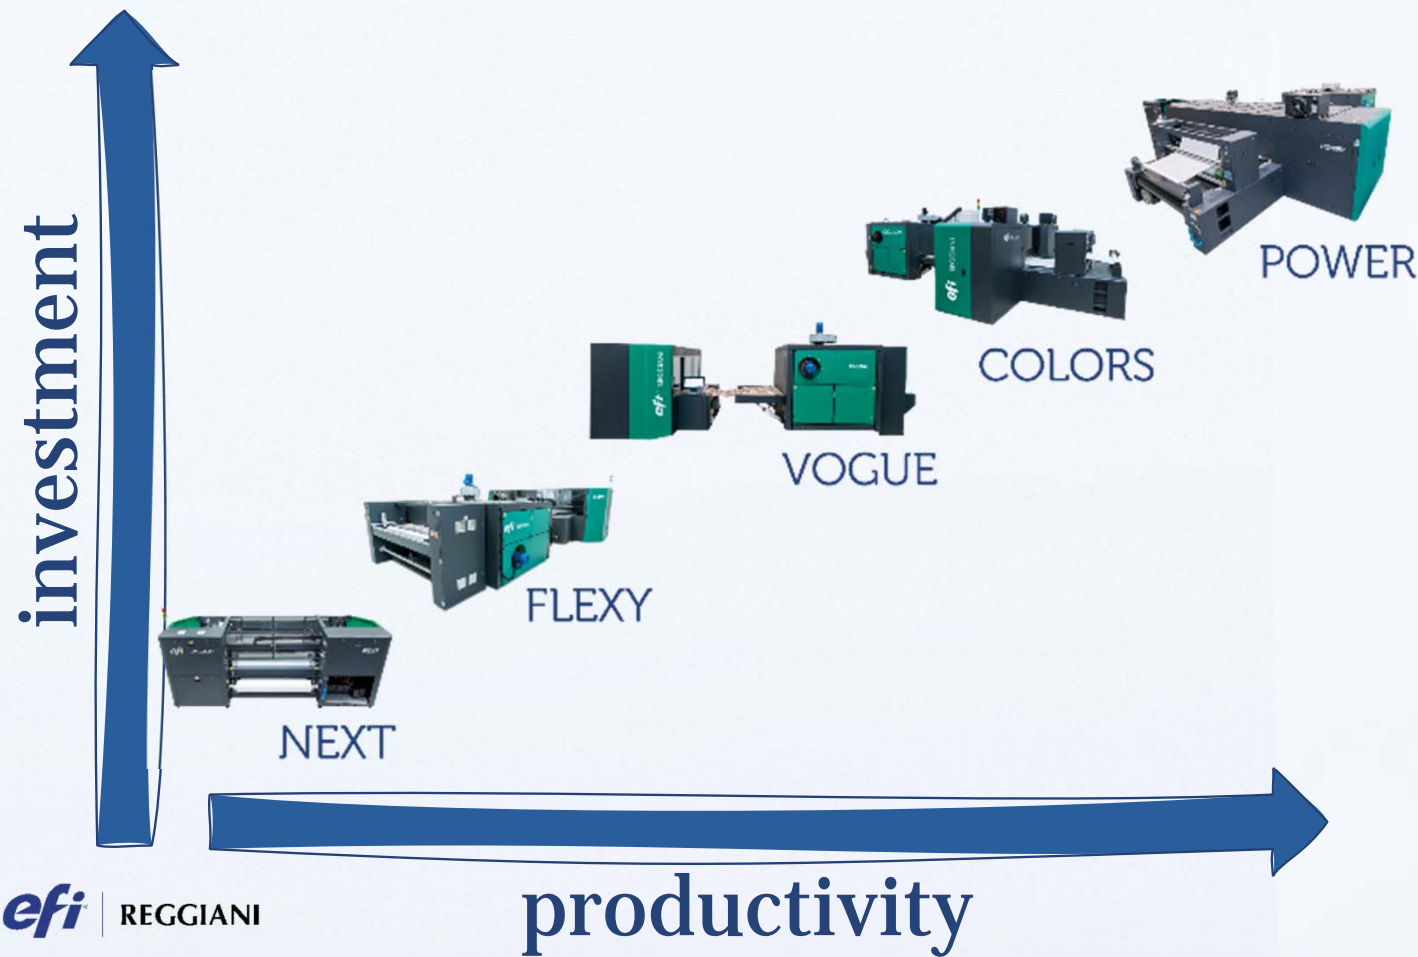

Solutions for all applications from small scale to mass production

digital – analog – inks & chemicals – pre-post treatments

EFI Reggiani Traditional Product Range

Innovation across the range

Cutting-edge innovation across the range

Continuous ink recirculation system to reduce purging and maintenance

Printing heads proprietary electronics for quicker set up time and increased reliability

Best print heads life: -60% replacement during warranty period

Printing software allowing real time image processing: from 3 minutes to 3 seconds

More **environmental conditions tolerant**

Higher uniformity printing modes

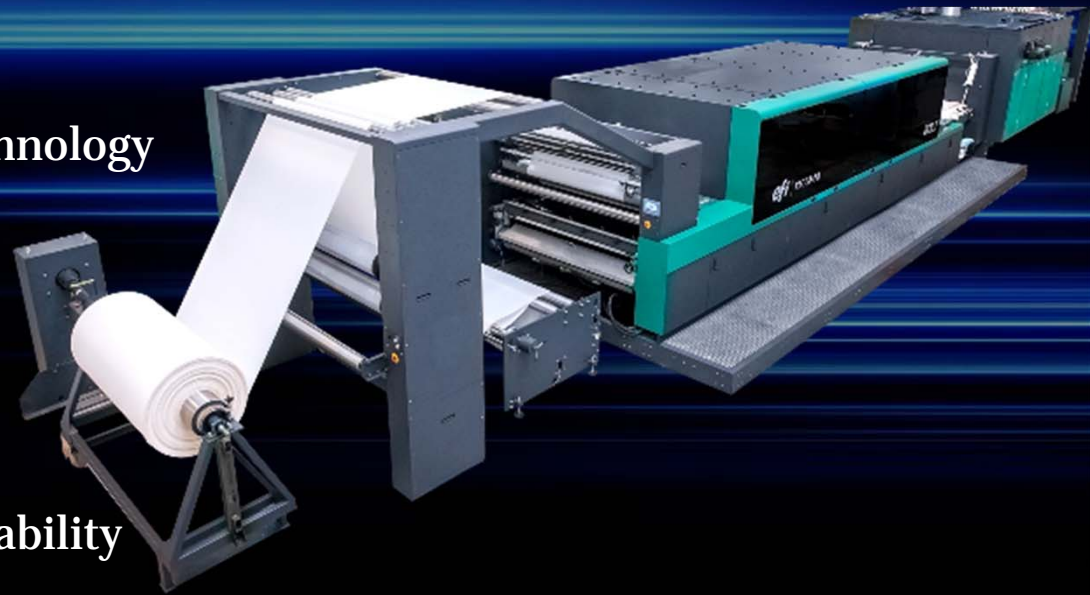

Increased user friendliness thanks to **new multi-language and multi-culture**

Improved aesthetics with **new look&feel**

BOLT

Rewrite the rules of Textile Single Pass

- **Unparalleled speed**
the only digital printer to reach a 90 meters per minute operational speed
- **No time lost for maintenance**
at start up and during production
- **Massive ink laydown**
in the same time unit compared to existing technology
- **Proprietary IP**
combining digital and rotary technologies for hybrid solutions
- **Competitive ROI**
thanks to high productivity and unmatched reliability

Inspire your creativity
with EFI Reggiani
water-based inks

Extraordinary color brightness and vibrancy

Extensive color gamut

Tailored on EFI Reggiani printers for superior reliability

Longer printheads life

Breakthrough technology designed to boost EFI Reggiani printers' performances

AQUA Premium Reactive

BDR Diamond Reactive

IRIS Disperse Dye Sublimation

ARIA Direct Disperse

FUOCO Acid

TERRA Pigment with binder

GEA Pigment

The background of the slide is a photograph of a textile mill. It shows large industrial machines with green metal frames and yellow safety railings. In the foreground, there are long racks filled with hanging fabric pieces, likely denim, which are being processed. The lighting is industrial, with bright spots from overhead lights.

EFI Mezzera complete range for all pre and post treatment processes: preparation, washing, dyeing, denim lines

Versatility for Any Fabric

With the Mezzera line of products, you'll get a variety of wet finishing treatments including pre-treatment, after printing, and dyeing lines.

Whether you have knitted or woven fabric, Mezzera offers the perfect solution.

Green Processes and Sustainable Solutions
