ANIMA
CONFINDUSTRIA
MECCANICA VARIA

Italy is renowned for innovative design, style, the superior craftsmanship of its consumer goods, the authentic flavors of its food and wines, the beauty of its landscapes and works of art.

These remarkable achievements stem from a long standing tradition of ingenuity and entrepreneurship that is embodied by a network often of thousands of small and medium sized companies scattered across the country.

The passion for technology is also part of Italy's terroir and it is ingrained in its history from

ancient Rome, to Leonardo Da Vinci's renaissance to today.

The Italian Trade Commission - ITA, ANIMA and Unacea are proud to participate at PDAC 2024 - the world's premier mineral exploration and mining convention - to showcase a few of Italy's most innovative earthmoving, mining and construction technology providers.

These Italian companies carry on Italy's dedication to technology and traditions. At PDAC 2024 they will present their products and services ranging from steels

and grinding media, hydraulic driven, high pressure washer, stone polishing, cutting and sawing machines, heavy duty slurry pumps for tough acidic and abrasive applications, material ropeways, cable cranes, and the FlyingBelt, a suspended rope conveyor belt.

To learn more about these companies, join us at the Italian Trade Commission - ITA, ANIMA and Unacea pavilion (Booth No. 7123N) at PDAC 2024 at the Metro Toronto Convention Centre, in Toronto from March 3 to 6, 2024.

See you at PDAC 2024!

MARCO SALADINI,
Italian Trade Commissioner - ITA Canada

ITA - ITALIAN TRADE AGENCY

ITA - Italian Trade Agency is the Governmental agency that supports the business development of Italian companies abroad and promotes the attraction of foreign investment in Italy.

Through a worldwide network of 79 offices in 65 countries, ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses.

ITA has operated in Canada, with two offices in Toronto and Montreal, under the Italian Trade Commission designation since the 1950s. In June 2023 the Vancouver office was inaugurated. To learn more about ITA, please visit www.ice.it

MACHINES ITALIA

Machines Italia's mission is to introduce North American manufacturers to a new kind of machine buying experience driven by flexibility, innovation, creativity, durability, reliability, and sustainability.

With its exclusive tools in the area of communication and providers' search it allows businesses and professionals to access Italy's innovative solutions and manufacturing excellence, all engineered with passion.

The platform, spanning across several channels, was created by the Italian Trade Agency in collaboration with major entrepreneurial associations and is active in Canada, Mexico and the United States of America.

UNACEA

UNACEA, the Italian Construction Equipment Association, represents both the equipment manufacturers as well as the commercial sector, which jointly generate a total turnover of € 3.5 billion and give employment to over 50 thousand workers.

UNACEA is a key member of Cece - the European federation of construction equipment industry. To learn more about UNACEA, please visit www.unacea.it

ANIMA

Founded in 1914, ANIMA Confindustria Meccanica Varia, represents and promotes the Italian mechanical engineering industry.

ANIMA is made up of 30 associations and product groups, and has over 1,000 member companies, employing almost 224 thousand people, with sales of €52.1 billion and exports on sales of 57.1%. ANIMA's industry sectors include: construction equipment, machines and products, goods handling and logistics, technologies and equipment for food and water products machines and plants for energy production and for the oil and

chemical industry, technologies and products for industry, machines and systems for personal and environmental safety.

ANIMA is a founding member of UNI (Italian standardization body).

ANIMA Confindustria is also the majority shareholder of ICIM Group, a holding that includes ICIM SpA, OMECO, Consorzio PASCAL, TIFQ, TIFQlab. ANIMA is a founding partner and an active member of Orgalim (The European Federation of Mechanical Engineering). To learn more about ANIMA, please visit www.anima.it

A large industrial robotic arm is the central focus, extending from the right side of the frame towards the center. The arm is yellow and black, with a complex structure of joints and cables. In the background, a yellow industrial lift or platform is visible, and the overall scene is dimly lit, suggesting a factory or industrial environment. The text "DISCOVER ITALIAN TECHNOLOGY" is overlaid in white, sans-serif font in the upper left quadrant.

ABS is the steelmaking division of Danieli Group, the construction leader of steel plants all over the world.

The company was established in 1988 by joining together hundred years of experience from two historical Italian companies. ABS Sfere is the division of ABS specialized in the production and distribution of grinding media.

ABS boasts a wide range of steel - it does produce over 1,000 types of steel grades. This makes ABS unique in the global steel industry arena. ABS employs over 1,500 people and has an annual turnover of over 1,442 m€.

ABS produces steel only using the electric cycle from scrap, which reduces emissions by 65% compared to the blast furnace cycle. ABS products are made using 95% recycled raw materials.

ABS Sfere leverages its expertise as a renowned Italian steel producer to cater specifically to the mining sector for diverse grinding applications, integrating advanced knowledge and engineering.

AGUDIO is the brand of Leitner dedicated to material transportation systems on ropes, solutions able to reduce distances and overfly obstacles such as valleys, rivers, and protected areas. Our product range includes Material Ropeways, Cable Cranes, and the FlyingBelt, a rope suspended conveyor belt.

With the FlyingBelt is easy to design hybrid systems (partially on the ground and partially suspended by ropes) with a single belt section and without intermediate material transfer points. This is possible, because the Flyingbelt uses the same components of traditional overland conveyor belts, such as a steelcord belt, rollers, drums, etc. The hybrid conveyor belt is optimizing the operating costs but also the investment, reducing civil works, earthmovings and supporting structures to overcome morphological obstacles.

AGUDIO is part of the HTI Group, a global player in the areas of ropeways (Leitner, Poma, LPoA, Bartholet), snow groomers, crawler carriers and vegetation management systems (Prinoth and Jarraff), snowmaking and dust suppression systems (Demacenko and WLP), renewable energy (Leitwind and Troyer).

Makbrent has been manufacturing trenchers since 1963. We supply micro and mini trenchers with remote control mostly for laying fiber optic cables.

The machines are also used for digging underground utilities in public or private parks, golf courses, gardens or civil engineering works.

Our product range includes chain implements for tractors, mini skid loaders or traditional excavators.

The chain implements are mostly used for irrigation works in agriculture.

Thanks to his patent, Neròn Pumps manufactures a unique hydraulic driven high pressure washer which is the smallest, the lightest & the most powerful worldwide.

The Neròn pumps are silent, selfpriming, they can be installed easily in any position on any equipment, with integrated hydraulic motor, unloader & safety devices built in. The pumps can be used with any liquid, fresh water, salt water, glycol, methanol & even hydrogen.

The Neròn pumps can be installed on your concrete trucks, concrete mixers, mining machines, drilling machines, excavator, asphalt & finishing machines, laser machines, tractors, vessels, sweepers & more for cleaning & dust suppression.

The advertisement features a central image of a yellow and black hydraulic pump. Dotted lines radiate from this pump to various pieces of machinery, including a backhoe loader, a tractor, a truck, a boat, a crane, and several different types of industrial washers. The background is a blue, abstract design with circular patterns. The Nerón logo is prominently displayed in the bottom left corner.

Nuova Mondial Mec is an Italian based manufacturer of a wide range of stone processing machines that has been operating since 1979.

In the early '80s, Nuova Mondial Mec launched its line of stone floor polishing machines thus becoming a global leader in this market segment.

Its range of equipment was later expanded to include radial and bench cutting machines and stone slab saws and soon Nuova Mondial Mec was propelled to the top of the world's ranking of suppliers of machines and equipment for the building and natural stone industries.

Today, with a range of over 150 different models, Nuova Mondial Mec is able to provide technology and solutions to meet all of its clients' needs and demands. Company's motto is: Reliability, Robustness and Simplicity.

Founded in 1947, Perissinotto S.p.A. manufactures the widest range of heavy duty slurry pumps for tough acidic and abrasive applications. Special alloys, hard metal and rubber lined pumps with customized design for single-stage, multi-stage, submersible, and vertical configurations. Some of the most appreciated features are:

Longer life, thanks to abrasion resistant PEMO design and materials.

- Corrosion resistant, using the most suitable alloys for aggressive fluids.
- Non-clogging, thanks to the special design of casings and impellers.
- Single, double or cartridge mechanical seals to prevent leakages and contaminations.
- Flow rate up to 2000 m³/h.
- TDH up to 160 m.c.l.

Perissinotto S.p.A pumps are used for transferring and circulating corrosive slurry, for feeding filter presses and hydrocyclons and for general slurry or sludge transfer. PEMO Pumps are commonly employed in the mining, quarries and aggregate washing, stone industry, ceramic market, precious metal refining, chemical manufacturing, fertilizer production, pharmaceutical, OFMSW treatment, food and beverage industries.

PEMO PUMPS

SLURRY PUMPS FOR THE TOUGHEST APPLICATIONS

DATI SU ESPORTAZIONI DI TECNOLOGIA ITALIANE NEL MONDO

Italy is one of the leading global manufacturers and exporters of industrial technology, including machinery and equipment for earthmoving, construction and mining.

Italy's equipment has a reputation for being technologically advanced, of superior quality and durability and extremely reliable. These features are particularly well received in North America. In 2022, Canada, the Usa and Mexico, jointly, bought over €17.5 billion worth of industrial and capital goods from Italy, representing 1/4 of Italy's total exports to North America.

Canada is the 19th destination market for Italian industrial technology while Italy is Canada's 8th largest supplier of machinery and equipment with €2 billion imported in 2022. In terms of earthmoving and construction equipment, Italy's exports to Canada totalled € 12 million, ranking

Italy 10th amongst Canada's major suppliers. Dumpers, dump trucks, derricks, cranes and works trucks fitted with a crane accounted for over 40% of Canada's sector imports from Italy.

According to Unacea, the Italian Construction Equipment Association, in 2022 Italy produced almost 26 thousand units of earthmoving, mining and construction equipment.

The main machinery categories assembled in Italy being crawler excavators wheeled excavators, wheel loaders, awes backhoe loaders, rigid backhoe loaders, mini excavators, skid steer loaders, track loaders, articulated dumpers, rollers, cold planers and finishers. The mini excavators accounted for approximately 50% of the machinery produced in Italy in 2022.
